SUMMARY

Motivated Software Engineering student with a strong interest in Java Backend development. Experienced in building RESTful APIs using Spring Boot and working with MySQL databases. Eager to learn, improve problem-solving skills, and contribute to backend development in a professional environment.

PROJECT

Connect Learning System

Jun 2025 – Sep 2025

Technologies: Java Spring Boot, Hibernate, MySQL, Redis, JWT, Cloudinary

- **Description:** A backend system for an online learning platform where users can connect, share learning resources, and manage courses.

- **Role:** Backend Developer (Team size: 5)

- **Key Responsibilities:**

- Developed **RESTful APIs** using **Spring Boot** to support user management, course management, and learning resource sharing.
- Implemented **JWT-based** authentication and authorization for secure user access.
- Designed and managed database entities using **Hibernate ORM** with **MySQL** for efficient data persistence.
- Integrated **Redis** caching to improve API response time and reduce database load.
- Integrated **Cloudinary** for image storage and media management.

Face Recognition GPS Attendance System

Dec 2025 – Present

Technologies: Spring Boot, Hibernate, Python, Redis, JWT, Cloudinary, Android

- **Description:** A mobile-based attendance system that verifies student attendance using facial recognition combined with **GPS location** validation.

- **Role:** Backend Developer

- **Key Responsibilities:**

- Developed backend **APIs using Spring Boot** for authentication, attendance management, and student data processing.
- Implemented **JWT-based** authentication and authorization.
- Managed database operations using **Hibernate ORM** with relational database design.
- Integrated **Redis** caching to optimize system performance.
- Built a Python-based **face recognition** module to verify student identity during attendance.
- Implemented **GPS-based location** verification to ensure attendance is recorded within authorized locations.
- Integrated **Cloudinary** for storing and managing student images used for face recognition.

EDUCATION

Hanoi University of Industry (HaUI)

Major: Software engineering

Sep 2023- 2027 (Expected)

KEY SKILLS

Programming Languages: Java, C++, C#, Python, SQL

Frameworks: Spring Boot, Spring Data JPA, Spring Security, Hibernate

Database & Storage: MySQL, SQL Server, Redis

Infrastructure & Tools: Docker, Git

Architecture Pattern: RESTful API, MVC, Design Pattern

Version control: Git

Languages: English Basic

ACTIVITIES

Academic Support | HIT Programming Club (HaUI)

Dec 2024 - Present

- Supported 2nd year students in fundamental programming concepts: Java Core, OOP, Multithreading, JDBC and Hibernate.
